OTHER THINGS TO CONSIDER

DESK THICKNESS

Desk thickness ranges from 22mm to 30mm. The thicker the desktop the more sturdy and hard-wearing the desk.

SELF ASSEMBLY

All ranges with this icon come flat packed. Some self assembly will therefore be required.

LEG OPTION

There are 3 types of leg option as follows;

4 - legged = Straight leg available on our entry level products and some general office furniture

Cantilever Leg = Allows the user greater freedom of leg movement whilst at the desk. Some cantilever legs have cable management integrated within the frame.

Panel End = Usually found on mid level and executive ranges offering additional solidity to the furniture.

CABLE MANAGEMENT

Most desks have cable ports in the desktop. True cable management allows cable to be concealed and routed under the desktop and through the leg frame.
